

# BellToken (BLL) — Project Whitepaper

Version 3.1 • Exchange-Readiness & Transparency Update

## 1. Executive Summary

BellToken (BLL) is a fixed-supply ERC-20 token deployed on Base. This document presents the project's transparent allocation policy, pre-launch sale, community airdrop, security approach, and roadmap. The deployed BLL token contract remains unchanged.

## 2. Token Specifications

Token: BELL TOKEN (BLL)

Network: Base (Chain ID 8453)

Standard: ERC-20

Decimals: 18

Fixed total supply: 1,000,000,000 BLL

BLL contract: 0x8257c74A62fDAdC192ffB6eAfa2c1534f11c28f0

Pre-sale contract: 0x2bB6918A2Cebe98Ee531D92F32feB983B0FCA2ca

Official X: @BELLTOKENul

## 3. Final Allocation Policy

| Category                | %     | BLL           | Purpose                                               |
|-------------------------|-------|---------------|-------------------------------------------------------|
| Public Pre-Sale         | 30%   | 300,000,000   | Public sale allocation                                |
| Liquidity               | 15%   | 150,000,000   | DEX liquidity and future liquidity support            |
| Ecosystem & Development | 22%   | 220,000,000   | Development, integrations, ecosystem incentives       |
| Treasury / Operations   | 15%   | 150,000,000   | Operations, legal, security, infrastructure           |
| Team & Advisors         | 10%   | 100,000,000   | 12-month cliff + 24-month linear vesting              |
| Community & Airdrop     | 3.75% | 37,500,000    | Community rewards and current \$30,000 airdrop target |
| Strategic Partnerships  | 4.25% | 42,500,000    | Strategic integrations and ecosystem expansion        |
| TOTAL                   | 100%  | 1,000,000,000 |                                                       |

## 4. Allocation & Vesting Policy

Public Pre-Sale: 300,000,000 BLL, governed by the deployed pre-sale contract. Liquidity: 150,000,000 BLL reserved for liquidity support and disclosed as released. Ecosystem & Development: 220,000,000 BLL intended for progressive, milestone-based use. Treasury / Operations: 150,000,000 BLL for long-term operational needs. Team & Advisors: 100,000,000 BLL with a proposed 12-month cliff followed by 24-month linear vesting. Community & Airdrop: 37,500,000 BLL (3.75%); the current program targets \$30,000 worth of BLL at the stated \$0.0008 reference price, with 60% unlocked at distribution and 40% locked for 3 months. Strategic Partnerships: 42,500,000 BLL (4.25%), with proposed minimum 12-month initial lock followed by gradual disclosed releases.

## 5. Pre-Launch Sale

Payment asset: USDC on Base. Price: 1 BLL = \$0.0008 USDC. Allocation: 300,000,000 BLL. Sale start: September 2, 2026 at 12:00 AM UTC+1. Sale end: October 28, 2026. Claim/distribution: October 29, 2026 at 4:00 PM UTC+1. Sale contract: 0x2bB6918A2Cebe98Ee531D92F32feB983B0FCA2ca.

## 6. Community Airdrop

Program period: September 3, 2026 12:00 AM UTC+1 through October 26, 2026 11:59 PM UTC+1. Target reward value: \$30,000 worth of BLL. Distribution: November 1, 2026. Unlocking: 60% at distribution; 40% locked for 3 months. Eligibility and anti-abuse checks may apply.

## **7. Smart Contract & Security**

The deployed BLL token is a standard fixed-supply OpenZeppelin ERC-20. The project intends to obtain an independent third-party security audit before major exchange outreach. Audit findings and remediation status should be published after completion. This document does not represent the project as audited until an independent audit is actually completed.

## **8. Transparency & On-Chain Verification**

Official contract addresses and material token movements should be published and labeled where supported. Locked or reserved allocations should not be presented as circulating supply until actually released. Allocation policy changes should be announced publicly. The deployed BLL token supply cannot be increased through the existing token contract.

## **9. Roadmap**

Foundation → Community Growth → Security & Market Readiness → Exchange Expansion → Ecosystem Growth. Exchange listing remains subject to independent platform due diligence and eligibility.

## **10. Risk Disclosure**

BLL is a digital asset and may be highly volatile. This document is not financial, investment, legal, or tax advice. Exchange listing is not guaranteed. Proposed vesting policies describe intended frameworks; actual locks and releases should be independently verified on-chain.

Document status: Version 3.1 allocation update. No BLL token redeployment is required for this documentation change.
